

About the Organization/Principals

Decision Software Systems is a small business concern established in 1984. The firm has provided technical expertise to many different organizations over time in various areas of technology and supporting roles.

Art Larson, President

Mr. Larson has over 20 years of technical expertise in Systems Engineering, Software Development, Design and Project Management for Information and Engineering environments. He has an MBA in Finance/MIS and a B.S. Physics. Extensive expertise in Object Oriented Design, Project Management, Marketing, Sales and Support, Technical Support, Communications, Client/Server Systems, Computer Security, Web & Database Systems Design/Development, Real Time Embedded Systems Design and Development. Expertise in Computer Security Systems and Software Engineering.

Recruiting and Service Contracting Solutions

We provide our clients expertise in Recruiting and Service Contracting. We have assisted clients with Service Contracts for Professional Services. The scope of which entails assuming the project responsibility building and integration of the technical team to meet to organization objectives. With respect to Recruiting we provide our clients Technical Professionals for Full Time, Temporary/Contracting Labor based on specific client requirements.

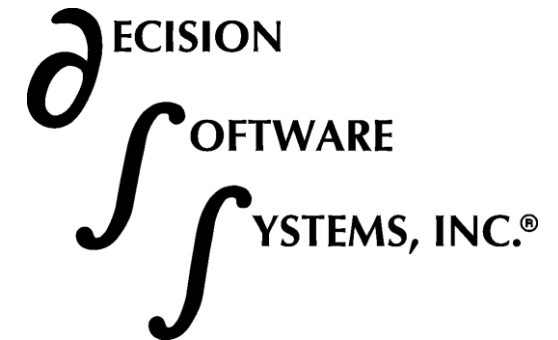

Sample Client List

- Danaher-Accu-Sort Systems
- AT&T
- Concurrent Technologies
- CSC
- David Sarnoff Research Labs
- Depository Trust Clearing Corp (MBCC)
- DRS Systems (General Atronics)
- GMAC Commercial Mortgage Co.
- Honeywell Process Control Systems
- Hughes Network Systems
- ITT Aerospace & Defense
- Kulicke & Soffa Industries
- Libra Systems
- L3 Communications
- Lockheed Martin
- Magnavox Government Systems
- Motorola Broadband Systems
- Philadelphia Stock Exchange
- PP&L
- Rohm & Haas
- R.W. Johnson Pharmaceuticals
- Securities Industry Automation Inc. (SIAC)
- Sarnoff Real Time Corp.
- Susquehanna Investment Group
- TeleCordia
- Volant-Velox Trading Systems
- WorldGate Communications

PRODUCTS

Turnkey Computer Systems Solutions: We are a Value Added Reseller for many different vendors such as IBM, HP, Toshiba etc. We sell Network components (Hubs, Routers, Modems etc.), 3Com, Shiva, CISCO, etc. PDA's ∴ We can configure computer LAN System to meet your corporate needs, We sell Color Printers, Network Printers, like HP, Xerox etc. Multimedia devices like Projectors: Proxima, In-Focus etc.

Computer Software Products: In addition, to Hardware we are a reseller for many different Software Products such as Microsoft, Sun, IBM, Network Associates, etc. We can assist your firm with professional consulting services to customize products/services to address your requirements.

Decision Software Systems, Inc.®

- *Provides Professional Technical Services*
- *On/Off Site Consulting Services*
- *Recruiting Services
Consulting & Full Time.*
- *Technical Solutions for IT &
Engineering Projects to Enable
Organizations to Meet Technology
Objective(s).*

Decision Software Systems Inc. (DSS)

Provides Software Consulting Services, Outsourcing, and Project Solutions to Financial, Engineering, Aerospace, Utilities, Communications and Pharmaceutical Organizations.

DSS is experienced in all phases of the software development process. DSS can provide consulting, complete solutions, technical support, on/off site project support/development, customized software development to assist your organization's technological requirements. We utilize a systems engineering approach to manage/organize Projects and to provide clear/concise technical definition to achieve successful technical solutions to address the Project Requirements. Our expertise allows us to provide your organization support in the following areas:

- Project Planning, Requirement and Technical Definition
- Design/Analysis for Information, Web & Engineering Systems
- Application and/or Systems Programming (UNIX & Win/XP/Vista/7 Environments)
- Internet Web Based Systems Development, E-Commerce/EDI, Security etc.
- Client/Server Based Systems Design/Development via RBMS (Oracle, Sybase, SQL Server, Informix etc.)
- Database Warehousing/Modeling, Migration, Support
- Verification and Validation of Software Projects
- Software Documentation Design and Support.
- Technical Training
- Compilers and Customized Development
- Real Time Embedded Systems Development (Can provide customized Operating System/Device Driver Support).
- Communication Systems Design, Support, Implementation
- Network Administration/Support and Management
- Middleware Systems Design, Development & Support
- Hardware and Software Products/Support: Computers, Software, Network Components etc.
- Wireless Communications Services, Wireless Infrastructure Services
- Customer Relationship Management Systems (CRM), Sales Automation etc.
- Virtual Server Migration Projects. VmWare

Areas of Expertise

DSS® Provides technical expertise in Object Oriented Programming Systems with extensive skills in Communications (Satellite and Secure Communications Systems), Computer Security, Financial Client/Server Systems, Databases, Web Based Systems, Robotics/Image Processing and Real Time Systems, Studies, Proposals and Training to provide solutions to businesses technology requirements. We believe in using the proper methodologies to support cost effective life cycle support and project management of technology. We have worked with Parallel Processing Systems, Neural Nets, various communications technologies, financial transaction trading systems, databases, Web Systems (3-tier Client/Server) along with COBRA and DCOM middleware interfaces and real time embedded systems development.

Professional Technical Consulting Services: Our goal is to provide service to Engineering and Information Technology Organizations. We are a small business concern with senior software development professionals. As a result of our years of expertise this enables us to meet requirements of Large Organizations. Over the years we have been able to meet or exceed the needs of many Corporations.

Project Management for IT/Engineering Business: Our approach is to utilize a systems engineer methodology to address not only the near term technical needs of the client but to leave a legacy of technology that can be properly managed for long term support and modifications by either the firms support staff or within our own organization as needed.

Internet Services, Computer Security Engineering/Web Database Systems Development: Another Area of technical skills is where we can provide a Internet Application/Systems Development. These skills cover areas such as technical analysis/design/implementation for Front End Clients, Backend Databases, E-Commerce/EDI, Internet Security, JAVA/ASP, J2EE, Client/Server, Database Modeling/Development for Internet Application, MS .Net/XP; Project Management/Planning Support and Analysis. We can develop turnkey web systems for clients, Assist in Web Hosting/Support, provide ISP connectivity, Support Wireless Communications Services/Development etc.

Hardware Systems:

Computer Systems: Sun Workstations/Servers, HP's, Intel based PC Servers, VAXs, Sequent and Alliant Parallel Processors, IBM Mainframes, AS/400 Systems, RS-6000 etc., Silicon Graphics, VmWare, Linux Systems.

Embedded Systems: Motorola : M680x0, MIPS, PowerPC Intel Pentiums, TI TMS32xx DSPs and 80x80's, F-16, AYK-14/44, UYK-20, Encryption Hardware, SOA, UML, Rhapsody.

Software Development Environment/Languages: UNIX/C++, JAVA SE/EE, JSP, Tomcat-Apache, Eclipse IDE/LAMP, MS Visual Studio .NET, Win/XP/Vista/Windows-7, COBOL Assemblers: Compaq Intel 80x80, Motorola M680x0, "C"/C++, ST: Java, Ada, FORTRAN, CMS-2M, UNIX/Posix, X Windows/Motif, Win XP/Vista, Win32 API, .Net, ASP Multi-Threaded Coding, DCOM, OLE, ODBC, Remote Data Objects, ActiveX, Lotus Notes, MS Visual C#/C++/Basic, Perl, Lex/Yacc (Compiler Tools), PeopleSoft, SAP, CRM, EDI, Real Time Embedded Systems.

Wireless Services: Win/CE and Palm OS, Blackberry, Bluetooth Development Interfacing, etc.

Operating Systems: UNIX Internals, Windows-XP/ Vista/ 7, Linux, UNIX/Posix, VxWorks, VRTX, pSoS, QNX, Vax/VMS, AIX, Irix, Extensive RTOS Systems Development.

Database Development Technologies: ORACLE, Sybase, MS SQL Server, MySQL Informix, CA ErWin, dbArtisan, Data Modeling, Design/Implementation/Support, ODBC Interfacing, 3-Tier Client/Server Database support/development etc. SQL/Stored Procedures Support/Development, Data Warehousing, Migration,

Computer Security: Encryption, Orange Book, Protection Profiles, Database Security, Communications Security, DCE, Intrusion Detection Systems, Tivoli, Infosec, Comsec/ Crypto Systems, EKMS, PKI, Infosec/EKMS, Red/Black Systems. SRD Radios, High Assurance Secure Communications

Telecommunications Technology: Expertise in many aspects of data communications such as wireless, audio/video data transmission, ISDN, E1/E3, T1/T3, Sonet, Ethernet, Secure Satellite Communications, LANS, ATM, SNMP, WAP, MPEG protocols, RFS Analysis through design/ implementation, Cable and Cellular Communications, FAA Communication Systems, ASN.1. Encoding/Decoding. FIX Trading Systems Communications Interfaces

Web Based Development Technologies:

JAVA EE/SE, Tomcat Apache, JSP, Java Servlets, Java Script, Eclipse IDE, Netbeans IDE ASP/Interdev/Front Page/Visual Studio. IBM E-Commerce, Web Site Development, Support/Enhancements etc.

Systems Engineering-Verification and Validation:

Systems Engineering for Embedded and Secure Communications Systems. Red/Black Planes, Control/Data Planes, EKMS/PKI, Radar/Fire Control Systems.
